Back-End: Django 4, FastAPI, PostgreSQL, RabbitMQ, MongoDB, RESTful APIs, Node.js
Front-End: React, React Hooks, Tailwind CSS, DOM manipulation, Redux Toolkit, Bootstrap, Angular
Other: Wordpress, Adobe Photoshop, Adobe Lightroom, Figma

Application Development Experience

TaskManagr | *Solo Developer* | gitlab.com/introvette/task-managr | August 2022- September 2022
An application that increases productivity by giving users an overview of the users completed/uncompleted tasks even in a collaborative environment.
- Developed and implemented full CRUD functionality for projects, tasks, and notes, using Django and Python to enable easy creation, editing, and deletion of records.
- Built front-end templates for each feature using HTML and CSS, delivering a modular UI/UX experience that improved user productivity and satisfaction.

Motor Gurus | *Full Stack Engineer Team* | https://gitlab.com/introvette/motor-gurus | September 2022 - January 2023
A car dealership management application that tracks automobile inventory, service appointments, and technicians.
- Created and implemented a full CRUD functionality for automobile, service, and sales records using Django and React, allowing users to easily create, edit, and delete records.
- Using React, JSX, HTML, and CSS, built modular UI/UX templates to develop intuitive user interfaces for record creation.

What The Fridge? | *Full Stack Engineer Team* | gitlab.com/whats-in-the-fridge | December 2022 - February 2023
What the Fridge makes cooking more accessible to users, and reduces food waste.
- Developed user preference algorithm and integrated Edamam API using React, FastAPI, and PostgreSQL.
- Implemented front-end features and templates with React Hooks, HTML, and CSS to provide a modular UI/UX experience.
- Utilized Redux Toolkit for default behaviors, and catching mistakes, making our application more efficient.

Professional Experience

General Manager/Social Media Manager | *Anntony's Caribbean Cafe* | Charlotte, NC   2018-2022
- Created, designed, and oversaw the maintenance of the ecommerce website for the restaurant's sauce.
- Generated an impressive social media following through curated content.
- Streamlined customer wait time and improved satisfaction by introducing QR codes for online ordering.
- Crafted and updated menus, monitored inventory levels, and assigned tasks to employees.

Facilities Management Intern | *Atrium Health* | Charlotte, NC   2014
- Compiled regular reports for upper management to ensure accuracy of data.
- Streamlined administrative process for the environmental services department, reducing paperwork and increasing organization.
- Gained invaluable insight into executive decisions by shadowing key leaders in the field.
